Diagnostic Imaging. The Department of Diagnostic Imaging is dedicated to improving and enhancing patient care and the health of children. Our mission is to be a benchmark paediatric radiology site by embracing new technologies and utilizing state-of-the art equipment efficiently and effectively. Recommended citation ICRP, 2013. Radiological protection in paediatric diagnostic and interventional radiology. ICRP Publication 121. Ann. ICRP 42(2). This book was written with you in mind, employing a user-friendly format, succinct information and over 2500 ultrasound images. Correlative images using other modalities are also included for comparison and to allow a quick and seamless transition between ultrasound and other modalities. Radiology is the medical specialty that uses medical imaging to diagnose and treat diseases within the body. A variety of imaging techniques such as X-ray radiography, ultrasound, computed tomography (CT), nuclear medicine including positron emission tomography (PET), and magnetic resonance imaging (MRI) are used to diagnose or treat diseases.
