

Download Energy Flow Webquest Answer Key

Atoms Around Us What is an atom? Atoms are building blocks. If you want to create a language, you'll need an alphabet. If you want to build molecules, you will need atoms from different elements. Question: What was the loudest sound ever described by humans? Hint: It was produced by the most famous volcano in recorded history. Answer: In 1883, the Krakatoa volcano in Indonesia erupted and threw ash and stone 300 square miles. BioCoach Activity Concept 1: An Overview of Photosynthesis. Photosynthesis converts light energy into the chemical energy of sugars and other organic compounds. Environmental Science is the study of the way humans interact with their environment, both living and non-living components. The goal of this class is to raise awareness on the global and local environmental issues we face today and the interdisciplinary studies involved in solving issues.
