

Download Exploring Big Historical Data

Welcome! We've designed this website as a basic introduction to historical research for anyone and everyone who is interested in exploring the past. 50,000+ of the smartest have already joined! Stay ahead of the bleeding edge...get the best of Big Data in your inbox. This is a wonderful extended discussion of the intersection of traditional statistics with "big data". There's a lot of math and the mathematical development, as well as the choice of topics, is informed by the issues raised in data exploration, and therefore well motivated for readers like myself who are more engineering focused. Generally considered as the first data visualization, the figurative map of Charles Joseph Minard (1869) shows the path of Napoleon's troops across the Russian Empire of Alexander I.
