

Download Integrated Optomechanical Analysis Book

In the Physical Section of Sensors, original peer-reviewed papers covering all aspects of Physical Sensing will be published. Both theoretical and experimental papers will be considered, as well as review papers. Engineering is the discipline and profession that applies scientific theories, mathematical methods, and empirical evidence to design, create, and analyze technological solutions cognizant of safety, human factors, physical laws, regulations, practicality, and cost. A computer mouse is a hand-held pointing device that detects two-dimensional motion relative to a surface. This motion is typically translated into the motion of a pointer on a display, which allows a smooth control of the graphical user interface. The scope of the photonics meeting is to bring researchers in the area of guided wave photonics; integrated and fiber, and lasers to share their findings with a broader audience.
