Download Linux Troubleshooting For System Administrators And Power Users

Kyle Rankin, a senior systems administrator and DevOps engineer, is president of the North Bay Linux Users' Group and is an award-winning columnist for Linux Journal.Although Linux is very reliable, wise system administrators should find a way to keep an eye on the system's behaviour and utilization at all times.A system administrator, or sysadmin, is a person who is responsible for the upkeep, configuration, and reliable operation of computer systems; especially multi-user computers, such as servers.The systemctl utility provides commands for shutting down the system, however the traditional shutdown command is also supported. Although the shutdown command will call the systemctl utility to perform the shutdown, it has an advantage in that it also supports a time argument.
