What are Industry Agreed Good Management Practices? Good Management Practices (GMPs) that can be used on farm to improve water quality (notably nitrogen, phosphorus, sediment, and faecal contaminants). Management (or managing) is the administration of an organization, whether it is a business, a not-for-profit organization, or government body. Efficient municipal waste water treatment produces vast amounts of sludge. For example, in the countries located wholly or partly on the Baltic Sea watershed the amount of sewage sludge generated is about 3.5 million tonnes of dry solids annually – this is expected to increase to almost four million tonnes by 2020.
