

# Download Medical Technology Inventing The Instruments Innovators

BIT is your product development, manufacturing and service partner for high performance clinical, medical and life science devices. Company History. Synthomics was founded by a group of Stanford researchers with the goal of improving biological research and the quality of medical treatment by making the most fundamental research tools as affordable as possible. Using population-wide data on inventors and their demographic characteristics, the paper analyzes trends and patterns by technologies in age, the level of education, and gender gap. A patent is a form of intellectual property. A patent gives its owner the right to exclude others from making, using, selling, and importing an invention for a limited period of time, usually twenty years.
