Metasploit is the world's most used penetration testing software. Uncover weaknesses in your defenses, focus on the right risks, and improve security. Blogs, How-tos, & Research. Our new blog will still publish the same cutting-edge research, analysis, and commentary you expect from Rapid7. EXPLOITATION USING CLIENT-SIDE ATTACKS Browser-Based Exploits. We'll focus on browser-based exploits within Metasploit in this chapter. Browser-based exploits are important techniques, because in many organizations, users spend more time using their web browsers than using any other applications on their computers. The Rapid7 Exploit Database is an archive of Metasploit modules for publicly known exploits, 0days, remote exploits, shellcode, and more for researchers and penetration testers to review. 3,000 plus modules are all available with relevant links to other technical documentation and source code.
