

# Download Mid Latitude Cyclone Lab Answers

September 11, 2001 Thirteen years ago, it was September 11, 2001. It was a beautiful, sunny day. But it was a day many people will always remember because of something that happened that morning. An interactive website powered by a dataset and algorithm detailed in a new study allows the global footprint of fishing to be tracked in real-time — down to the level of individual vessels. Here is a history of questions and answers processed by "Ask the Physicist!". If you like my answer, please consider making a donation to help support this service. Don't worry. You are not losing it. Ireland is in the "cone" of uncertainty in that map below. Hurricane Ophelia is the 10th consecutive hurricane to form in the Atlantic basin this year.
