

Download Partnership The Ship Who Sang Is Not Alone

Disney Cruise Ship Rescues Passenger from Another Ship Who Fell Overboard I read McCaffrey's initial "brain ship" stories, collected as *The Ship Who Sang*, many years ago. I picked up this book expecting a light read, and instead found myself immersed in an intriguing tale of a young woman's journey from adolescence into adulthood. Great stuff! One of McCaffrey's better works, and for me a good introduction to co-author Ball. *PartnerShip* (1992) is the second SF novel in the *Brainships* series, following *The Ship Who Sang*. In the previous volume, Helva -- XH-834 -- gained enough credits to payoff her debt to Central Worlds. Yet they wanted her to extend her contract for at least one more mission since she was uniquely qualified. Helva bargained with them to increase her pay and to provide her with a specific Brawn of her own choice. By Anne McCaffrey *PartnerShip: The Ship Who Sang is Not Alone* [Mass Market Paperback]
