A number of authors have noted that if some physical parameters were slightly changed, the universe could no longer support life. This fine-tuning of the universe is cited by philosopher and Christian apologist William Lane Craig as an evidence for the existence of God or some form of intelligence capable of manipulating (or designing) the basic physics that governs the universe.

1. Fine-Tuning for Life: the Evidence

1.1 Examples from Physics. Our best current theories of fundamental physics are the Standard Model of elementary particle physics and the theory of general relativity. Stephen Hawking and Victor Stenger have the answer as to why there is something instead of nothing—nothingness is unstable and automatically produces matter, energy, space and time at will.
