

# **Download Uc Davis Almond Production Manual**

Soil moisture sensors are great tools to aid in irrigation management. They provide feedback on the movement and depth of moisture within the soil, providing the ability to identify the proper duration of irrigation. During the first two weeks of November, I was able to attend the once-every-four-years International Research Congress on Pistachios and Almonds. California Agriculture - Current issue and featured articles ... Multiple species of Phytophthora have been identified in production facilities of plants used in reforestation and restoration projects. Overview. Growers have long been concerned about water quality, but today water quantity has emerged as a leading consideration in managing irrigation.
